

Figure 2. Estimated annual number of elvers returning to the East River Chester in all years in which monitoring has occurred, and the linear regression of all data points.

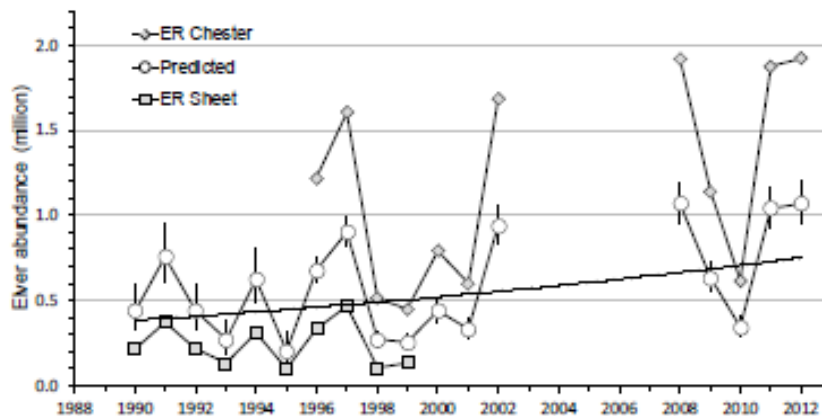

Figure 3. Estimated annual elver run size to East River Sheet Harbour (1990-1999) and East River Chester (1996-2002 and 2008-2012; DFO 2014). “Predicted” values are the composite elver recruitment index for the Maritimes Region from the 2014 RPA.
